

# DAPP DEMO

---

## TEAM

Nnamdi Umeh - Team Lead

Promise Odinye - UI/UX Designer

## Problem

Accountability in today's world is a big challenge, and this is even more visible across NGOs trying to use human empathy as a tool for fraudulent activities.

Furthermore, a lack of trust prevents well-meaning NGOs from accessing funds because people are worried that their funds are not used for anything meaningful.

## Solution

Nye is a secure and transparent platform for NGOs and donors.

Users can donate on Toronet blockchain and Nye ensures it reaches the beneficiary wallet!

Nye combines the speed, scalability and affordability of Toronet to allow users to donate to any cause using toro tokens.

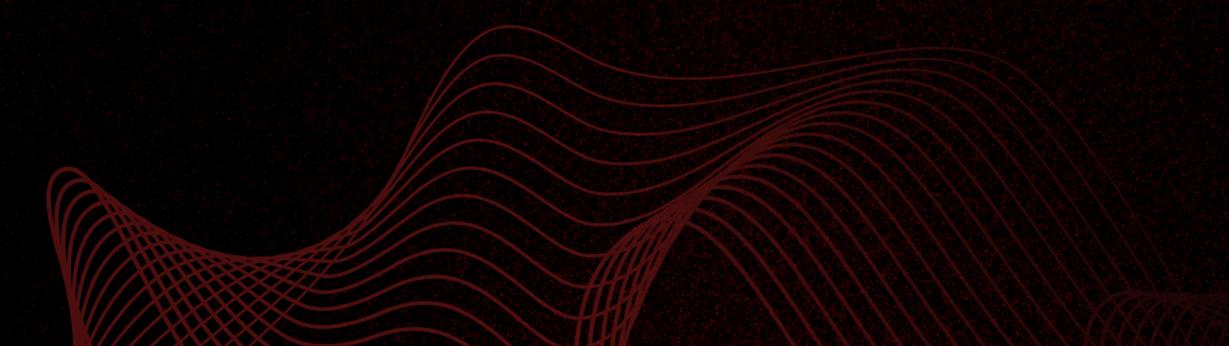

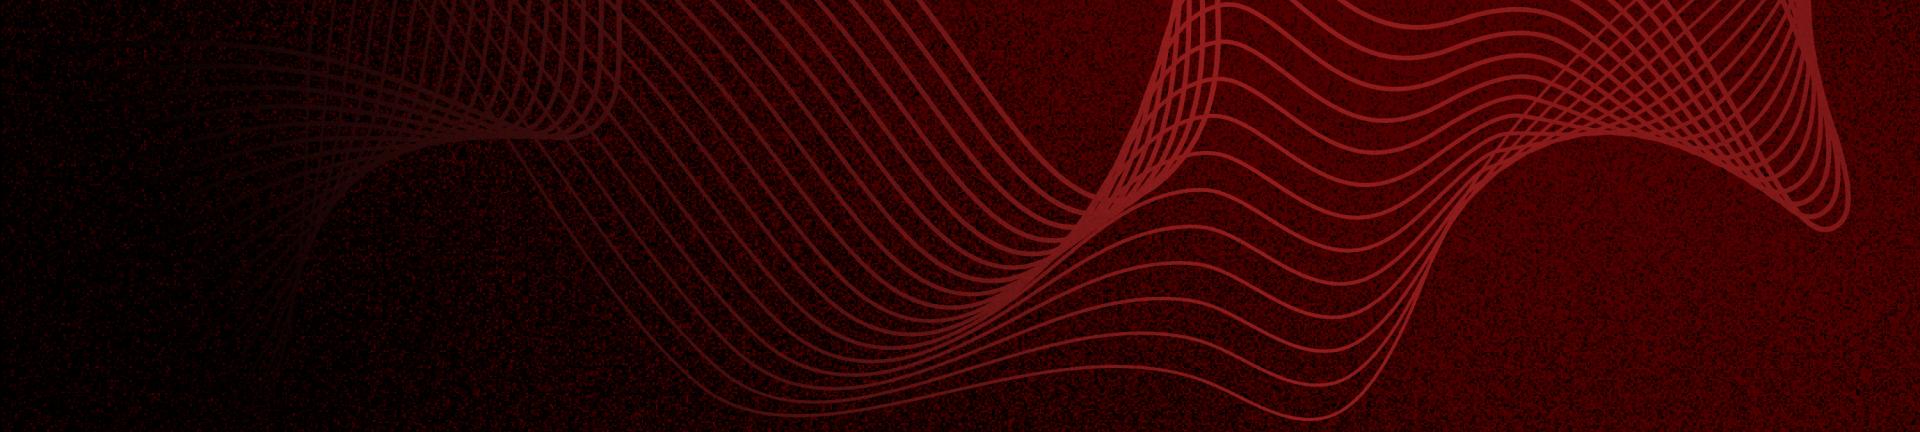

### NGOs on SANCTUM

NGOs after due process, mints a soul-bound token that serves as on-chain verification. They're then able to create campaigns which users can donate to using Toro.

### Donating on SANCTUM

When users donate, they earn NYÉ tokens that allow them to participate in the dApp's future and community.
